

CREATING CLEANTECH SOLUTIONS

greennet
FINLAND

■ OUR OBJECTIVES ■

GREEN NET FINLAND is a cleantech business network that brings together the expertise and resources of Finnish cleantech companies, public authorities and scientific and educational institutions.

The challenge of promoting sustainable development, including climate change adaptation and mitigation, requires new and effective modes of operation. Green Net Finland meets this challenge through multi-disciplinary integration of environmental and energy sector expertise with that of the ICT sector, thereby creating a fertile environment for new, innovative and energy efficient solutions.

We collate and centralize a wide range of environmental and energy sector know-how, in order to create new business opportunities, support the development of small to medium size enterprises and improve export activities.

- **High-quality projects and professional project management**
- **New business opportunities**
- **Project financing expertise**
- **Networking and matchmaking opportunities**
- **National and international cooperation in cleantech sector**
- **Events, like seminars and workshops**

■ THEMATIC FOCUS AREAS ■

- *Environmental monitoring*
- *Clean energy, with a special focus on energy efficiency in urban environment*

We believe in the growth of the Finnish cleantech business by combining the expertise in these sectors with the strong ICT cluster.

Our core activity is the development of Finnish environment sector expertise through the creation of environmental business networking partnerships.

We prepare and implement projects combining public and private funding together with our member organisations and other environment sector actors both nationally and internationally.

GREEN NET FINLAND – YOUR LINK TO FINNISH CLEANTECH CLUSTER

We are actively looking for cooperation with cleantech companies and research organisations all over the world.

Furthermore, we can provide partner search and match-making services for foreign cleantech companies and research organisations interested in cooperation with the Finnish Cleantech cluster.
